Fence, straight head wood grain pattern	10x100x1.5	2.4	10
	10x150x1.5	3.6	6.66
Fence, round head wood grain pattern	10x100x1.5	2.4	10
	10x150x1.5	3.6	6.66

Stud Preparation

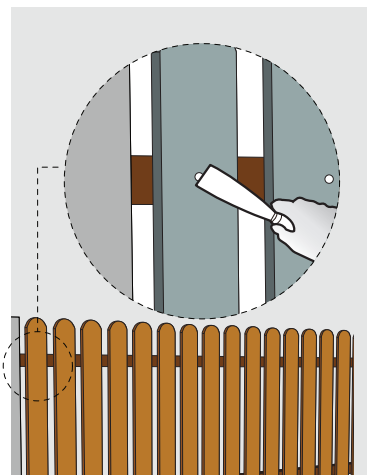

Install fence structure by spacing poles no more than 300 cm. on center, with a 100 - 150 cm. height, and stud spacing should not exceed 60 cm.

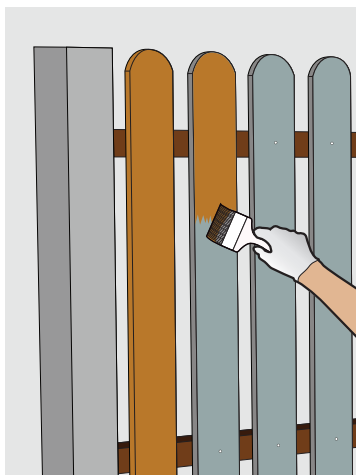

Primer should be applied to old plaster before applying natural color.

2 Apply acrylic sealant or polyurethane sealant putty on screw heads, then top with water-based acrylic paint (1 - 2 coats for artificial planks).

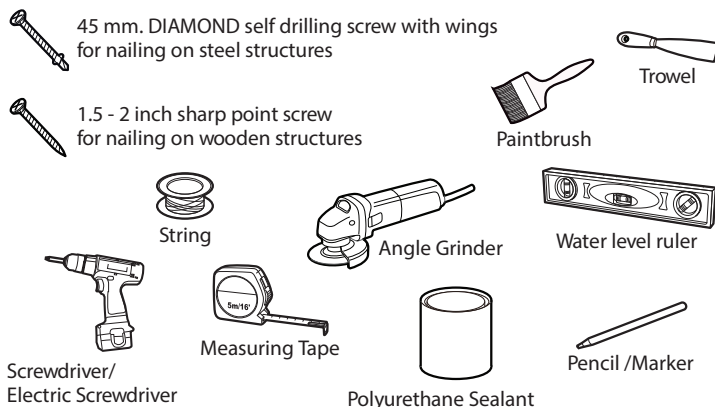

Apply putty on screw heads.

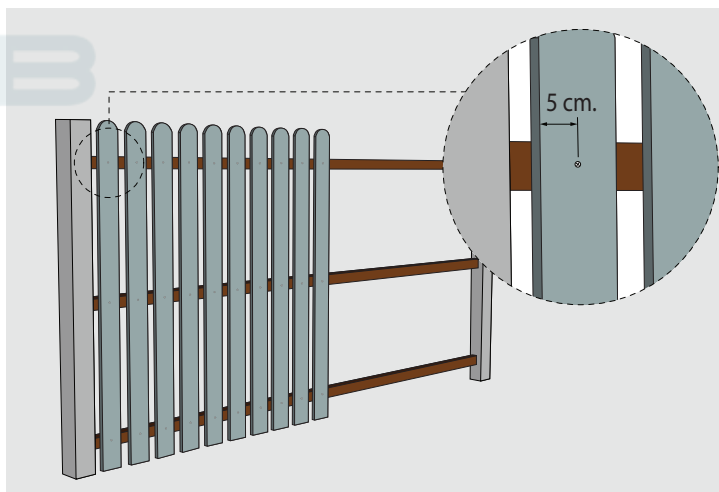

Top with water-based acrylic paint for artificial planks.

Installation Accessories for DIAMOND Fence

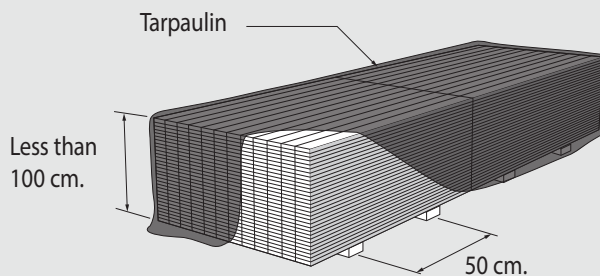

1 Nail fence with screws in the middle of the plank. Screw 45 mm. self drilling screws with wings for steel studs, and 1.5 - 2 inch sharp point screws for wood studs.

Storage

Fences should be stored in the shade. Do not expose to rain. Maximum stacking height: 100 cm. Use 1.5 x 3 inch hardwood planks for a base under the fences.

Tips on installing fences

- Do not apply enamel paint to the fences as it will not stick and peel off later.
- We reserve the right to not be liable for any damage caused by inappropriate use or use that differs from the manual.
- For the Company's standard installation, please consult with our technical service department. Tel. +66 36 224 171 - 8 ext. 222.
